Percentage: 93%

SKILLS

Programming Languages	C, C++, Javascript, Python, CSS, HTML5, Java, Lua
Libraries/Frameworks	React, Vue, Bootstrap, NodeJS, NextJS, ExpressJS, Vite
Tools / Platforms	Git, VS Code, VS Codium, Sass, Tailwindcss, Cursor
Databases	SQL, MySQL, MongoDB

PROJECTS / OPEN-SOURCE

LIVEDOCS | Link   Javascript, NextJS, React, LiveBlocks, Tailwindcss

- This project was created with the aim of solving the problem of not having to chat with the person editing the document from the other end within the editor itself and having to use other platforms at the same time. This increases the time spent to complete the document
- A live chat room is implemented inside the editor

YOOM | Link   NextJS, React, Typescript

- This project was created with the aim of recreating the existing video conferencing app "Zoom".
- On creating this project i could understand the concepts of Typescript, Nextjs and React a lot better
- Further using "Tailwindcss" as the styling master in this project gave a hype to this project

2048 | Link   React, SCSS, Javascript

- This project is a recreation of the classic 2048 game in Javascript's REACT Library
- Also this is an Animated version of the classic version using gif's instead of images
